

Customer Support Guidelines

Document Code: CS-001 | Version: 1.8 | Effective Date: 1 Jan 2026

1. Support Channels

- In-app / website live chat.
- Help center with self-service FAQs and order-specific help flows.
- Phone support for priority or unresolved issues.
- Social media channels for general inquiries (not for sharing personal or payment details).

2. Response Time Targets

Channel	Target First Response	Target Resolution
Live Chat	< 5 minutes	Same session where possible
Help Center Ticket	< 24 hours	2–5 business days
Phone Support	Immediate (queue dependent)	Same call where possible
Social Media	< 12 hours	Redirected to ticket if complex

3. Information Needed From Customers

- Order ID or tracking number.
- Description of the issue and, where relevant, photos or video.
- Preferred resolution (refund, replacement, exchange, information).

4. Tiered Support Model

Tier 1 agents handle common queries (order status, general policy questions, basic returns). Complex cases — payment disputes, suspected fraud, repeated seller violations — are escalated to Tier 2 specialist teams or Trust & Safety.

5. Customer Communication Standards

- Use clear, respectful, and jargon-free language.
- Never request full card numbers, passwords, or OTPs over chat or phone.
- Confirm resolution details in writing (chat transcript or email) for the customer's records.
