

Delivery Timelines by Region

Document Code: DEL-002 | Version: 2.0 | Effective Date: 1 Jan 2026

1. Order Processing Time

Sellers are required to hand over ready-to-ship orders to the courier partner within 24–48 hours of order confirmation, unless the listing specifies a longer processing/production time (e.g., custom or pre-order items).

2. Estimated Delivery Time (EDT) Calculation

EDT shown at checkout = seller processing time + courier transit time for the destination zone + any buffer for public holidays or weather disruptions.

Order Type	Typical Processing Time
In-stock, local seller	1 business day
In-stock, cross-border seller	2–3 business days
Pre-order	As stated on listing (can exceed 15 days)
Made-to-order / customized	3–10 business days

3. Public Holidays and Peak Campaigns

During major sale campaigns (e.g., mega sale days) and public holidays, delivery timelines may extend beyond the standard estimate due to higher parcel volumes. Any such extension is communicated via banner notices on the app and website.

4. Delayed Shipment Compensation

- Customers may request order cancellation with full refund if a shipment has not been dispatched within the promised processing window.
- Repeated late dispatch by a seller may result in a reduced seller performance score and visibility penalties (see Seller Code of Conduct).
