

Cash on Delivery (COD) Policy

Document Code: PAY-002 | Version: 1.5 | Effective Date: 1 Jan 2026

1. What Is Cash on Delivery

Cash on Delivery (COD) allows customers to pay in cash at the time the order is physically delivered, rather than paying online in advance.

2. COD Eligibility

- Available only for select categories and order value thresholds.
- May be restricted in remote areas with limited courier cash-handling.
- Not available for digital goods, vouchers, or certain high-value items.
- New accounts or accounts with a history of refused COD orders may have COD temporarily disabled.

3. Customer Responsibilities for COD Orders

- Have the exact or close amount ready at the time of delivery.
- Be reachable at the delivery address during the delivery window.
- Inspect the parcel before payment where the courier allows it.

4. Refused COD Deliveries

Orders refused at the doorstep without a valid reason (such as visible tampering) are treated as a failed delivery. Repeated unjustified refusals may lead to COD being disabled on that account, requiring prepaid methods for future orders.

5. COD Refunds

Since no online payment was made, COD refunds (for later returns) are issued via bank transfer or e-wallet credit rather than reversal to a card, as described in the Refund Policy.
