

Payment Methods Policy

Document Code: PAY-001 | Version: 2.0 | Effective Date: 1 Jan 2026

1. Accepted Payment Methods

- Credit and debit cards (Visa, Mastercard, and other supported networks).
- Bank transfer / online banking.
- Digital wallets and mobile payment apps.
- Cash on Delivery (COD), where available.
- Buy Now, Pay Later / installment plans, where available.
- Store credit, vouchers, and gift cards.

2. Payment Security

Card and bank details are processed through PCI-DSS compliant payment gateways. The platform does not store full card numbers on its own servers; tokenized references are used for recurring or saved-card checkout.

3. Failed or Pending Payments

If a payment fails after the amount is deducted from a customer's account, the amount is automatically reversed by the payment provider, typically within 5–7 business days, and the order is not confirmed until payment is verified as successful.

4. Currency and Pricing

Prices are displayed in the local currency of the storefront. Cross-border purchases may be subject to currency conversion by the card issuer or payment provider, along with applicable customs or import charges.

5. Installment / Buy Now Pay Later Terms

Where offered, installment plans are provided by a third-party finance partner. Approval, interest, and late-payment terms are governed by that partner's own terms and conditions, disclosed at checkout.
