

Refund Methods & Timelines

Document Code: REF-002 | Version: 1.4 | Effective Date: 1 Jan 2026

1. Refund Processing Stages

- Stage 1 — Validation: the return/cancellation reason and any required photo evidence are reviewed.
- Stage 2 — Approval: refund amount is calculated, including any deductions.
- Stage 3 — Disbursement: funds are released to the refund destination chosen by the customer or determined by the original payment method.

2. Refund Amount Calculation

Refund amount = item price paid – non-refundable fees (if any) + shipping fee refund (only when the return reason is attributable to the seller or platform, such as damaged or wrong item).

Scenario	Item Refunded	Shipping Fee Refunded
Seller sent wrong/damaged item	Yes	Yes
Customer changed mind	Yes	No
Order cancelled pre-dispatch	Yes (full)	N/A — not charged yet
Failed delivery, returned to sender	Yes	No

3. Store Credit Option

Customers may opt to receive a refund as store credit instead of a cash/original-method refund. Store credit is typically issued instantly and may carry a small bonus incentive as disclosed at the time of choice.

4. International / Cross-Border Orders

Refunds for cross-border orders may take longer due to additional currency conversion and customs-related processing, typically adding 3–5 extra business days to the standard timeline.
