

Refund Policy

Document Code: REF-001 | Version: 2.5 | Effective Date: 1 Jan 2026

1. When a Refund Applies

- An approved return has passed quality check.
- An order is cancelled before dispatch.
- A delivery attempt fails permanently and the parcel is returned to sender.
- A payment was made but the order could not be fulfilled (out of stock, seller cancellation).
- A price adjustment or goodwill credit is approved by customer support.

2. Refund Methods

Refunds are issued to the original payment method by default. For cash-on-delivery (COD) orders, refunds are issued to the customer's e-wallet or bank account, since no card or account was originally charged.

Original Payment Method	Refund Destination	Typical Timeline
Credit/Debit Card	Same card	5–10 business days
Digital Wallet	Same wallet	1–3 business days
Bank Transfer	Same bank account	3–7 business days
Cash on Delivery (COD)	Platform wallet or bank transfer	3–7 business days
Store Credit / Voucher	Store credit reissued	Instant to 24 hours

3. Partial Refunds

Partial refunds may be issued when only part of a multi-item order is returned or cancelled, or when a minor, mutually agreed deduction applies (for example, a missing free gift that cannot be returned separately).

4. Refund Status Tracking

Customers can track refund status under "My Orders > Refund Status." Status moves through: Refund Approved → Refund Processing → Refund Completed. Bank processing times beyond the platform's control may add a few extra business days.

5. Failed or Delayed Refunds

If a refund does not reflect within the stated timeline, customers should contact Customer Support with the order ID and payment reference. Support will investigate with the payment provider or bank before reprocessing.
